

This list shows some of the Garden's best plants and how they might be used. These plants come from the five mediterranean-climate regions of the world, including California, where dry summers exist.

Our 2009 edition of *128 of Our Best* contains full color photos and plant information for each of these plants as well as their location in our Garden. It is available for purchase in Eve's Garden Shop.

Many of these plants are for sale at the Garden Shop and at our periodic plant sales. Visit the Garden's website www.slobg.org to find dates for these sales and other Garden events.
